Before entering this sweet shop of mechanical, leather, chrome and carbon fibre delights, bent on making your Triumph even more individual, please read the following:

All Triumph accessories are designed, tested and launched in parallel with the bike they're intended for. We don't build a machine and then look around to see what we can bolt on. When it's still taking shape out of wood and clay, so are the accessories.

## 4 Triumph Accessories. Shaken, not stirred

But what may look great in theory has to work in practice – so that's when we rock and roll: as always, the accessories have to live through the exact same endurance tests as the prototype bike. First up - and most hellish - we use a special endurance track that shrinks the equivalent of 120,000 miles of riding into just two weeks.

The track is unbelievably punishing - it simulates every bump, pothole, crater and variety of road surface a bike would normally encounter over its lifetime. And it doesn't end there. Fully accessorised bikes are driven thousands of miles by Triumph test riders on road, off road, in all types of weathers, in the UK and overseas. Just to make sure everything performs like it has to in the real world. Some of those thousands of miles are deliberately ridden at speed to double check that no accessory compromises a bike's safe handling and stability.

There are Quality Engineers at Triumph whose job it is to be totally, doggedly and - some would say - unreasonably hard to please. People whose desks are littered with dissected motorcycle parts and UV test results. It's their obsession to try and make sure you never have a problem with any Triumph Genuine Part or Accessory.

At prototype stage, they X-ray apparently flawless castings looking for porosity; they subject paintwork to humidity and salt spray tests; they scour the world looking for the perfect fastener. And they regularly visit suppliers to make sure standards are being maintained. They are, quite simply, obsessed by quality.

## 6 Quality Engineers on a mission

Thank you for your attention. You may now shop.

P.S. Accessories fitted to your bike at the pre-delivery inspection share the same two year warranty as the bike.

P.P.S Here's a thing you probably didn't know. All Triumph parts and accessories are hand painted. Robots just don't have the same eye for detail.

Draw crowds,  
don't follow them

Leather panniers  
and embellishers

10

## Cruisers

### What makes a great pannier? Bags of leather

4mm thick Aniline leather to be precise. That's high-grade cowhide to you and me - and the beauty of it is, it keeps its natural look. That's because the leather has been naturally tanned, not coated or pigmented. Design plays on the triple theme with three, quick release buckles and three chrome dresser rails. Each bag will carry 28 litres of assorted life enhancing objects, and you can add inner bags for extra storage options and weather protection.

## Release your inner Bonneville

You didn't think it was possible to add more character to a bike like this? Listen up. Outwardly, these pipes look the same as the Bonneville's standard silencers, but these off road versions \* mimic the evocative sound of an original vintage Bonnie.

\*Silencers

Triumph Accessory Silencers do not conform to EPA noise standards. Use on a motorcycle subject to EPA regulation constitutes tampering and is a violation of federal law. These products are designed for closed circuit competition use only. Triumph Accessory Silencers may require carburettor re-jetting or a specific tune download depending on the model. Where required, appropriate jets are supplied with silencers and engine tune conditions for fuel injected models are available from your authorised Triumph dealer.

### Biking by numbers

What a great bike the Scrambler is to get attached to. You can attach a number board and personalise it with your own numbers or letters. You can attach a chrome headlamp grille. You can attach a single seat and rack. You can attach a skid plate. You can even attach a tacho. Yep, it's certainly a bike you can grow authentically attached to.

Sixty8. A range of pretty cool accessories for Bonneville inspired by a pretty cool year. In 1968, bikes were anarchy. Revolution was in the air. The Rolling Stones were charting with Jumping Jack Flash. Steve McQueen made Bullitt and Triumph built a classic Bonnie they still talk about. Today's Bonneville owes their essential style to this '60s hero but the accessories, like the performance and handling, are bang up to date. Interchangeable tank covers, contemporary seat options and City Luggage. After all, who needs panniers that could swallow a tent when all you travel with is a laptop and an iPod?

50

## Ride retro, ride Sixty8

\*The Sixty8 range of accessories is suitable for use on all Classic models, unless otherwise stated. Please see your authorised Triumph Dealer for full details.

### Boxing clever

These panniers are equipped with clever, self-sealing lids to keep your stuff dry no matter what the weather. Panniers have been designed in tandem with the bike itself to make sure you get rugged, durable touring equipment totally integrated with the bike.

## Carbon fibre: the light fantastic

The Carbon Fibre Range for the Daytona 675 uses the same high grade carbon fibre that is supplied to World Superbike and Formula 1 teams. So it's rather good: incredibly light and incredibly strong. Use as much or as little as you like – it always looks stunning. Range includes carbon heel guards, front mudguard, cockpit infill panels and a silencer heat shield with end cap.

## 3 into 1 Exhaust System

# Urban Sports

### Arrows of desire

You wouldn't have thought it was possible to improve the stock bike's looks but the 3 into 1 exhaust system\* with titanium end can is a powerful addition to those street fighter looks. This gorgeous system was designed in close partnership with Arrow and apart from looking great, it's 60% lighter than the stock system and lets the Speed Triple breathe a little more freely, releasing even more power.

#### \*Silencers

Triumph Accessory Silencers do not conform to EPA noise standards. Use on a motorcycle subject to EPA regulation constitutes tampering and is a violation of federal law. These products are designed for closed circuit competition use only. Triumph Accessory Silencers may require carburettor re-jetting or a specific tune download depending on the model. Where required, appropriate jets are supplied with silencers and engine tune conditions for fuel injected models are available from your authorised Triumph dealer.

## Urban Sports

74

### Leader of the packs

Some people can tour with just a toothbrush and a credit card. So, if you travel light or just need something for short trips, all you'll need is the compact, 15 litre sports tank bag. But if you take more than just a few basics, go for the 20 litre option which expands to a cavernous 30 litres and can be zipped to the smaller bag to give you even more capacity. Bags are made from high-density weave nylon and include a see-through map pocket, rain cover and full tank harness option. Heavy duty straps are also included to make bags easy to carry off the bike.

Triumph Genuine Parts are the real deal. Original equipment. The same parts that we use in the factory to build your bike. Fit them and you know without a shadow of doubt that you are replacing like with like. The same machined tolerances. The same performance. The same obsession with safety and reliability. Ultimately, the same peace of mind.  
And no compromise

80

## Be original

## Alarms

82

## Self defence

All Triumph Motorcycles are equipped as standard with an alarm connector block within the wiring harness. This allows the Triumph alarm system to be correctly installed onto the machine without modification of the wiring loom.

The Triumph alarm system is a special development of the class leading S4 alarm system from Datatool.

The Triumph alarms are designed specifically for each model to ensure compliance with insurance criteria, maximum security and quality of installation.

- Dual circuit, passive immobilisation with delayed anti hot-wire detection
- Remote controlled activation of the alarm system
- Customer selectable pin override number in case of remote control loss or damage
- Customer selectable passive immobilisation or full alarm arming
- Dealer selectable siren tone (8 tones)
- Ferry mode, movement and nudge sensors can be removed when armed as an alarm
- Hazard warning light function for emergencies
- Three stage 'sleep mode', extends battery life
- Low battery warning, to alert the owner if the machine's battery starts to become discharged
- Customer selectable 'Winter Mode', reduces current usage to a minimum for extended storage
- Fully resin bonded design, combats water ingress and improves attack resistance
- Metal siren nose cone, offering increased protection for the high power siren
- Solid state movement sensor, adjustable through 4 stages of sensitivity
- Adjustable nudge sensor, adjustable through 10 stages of impact level before 'warn-away' alert is activated
- Number of nudges to full alarm reaction adjustable through 7 stages
- Fully waterproof ergonomic remote control design
- Ignition key can be fully integrated with remote control for added convenience
- Auto re-arm, ensures protection remains at the level selected if accidentally disarmed
- Up to 4 additional remote controls can be installed onto the system
- Stolen or lost remote controls can easily be removed by your dealer to maintain security
- Thatcham Category MC1 Compliant - Model specific
- Compiled with the British Insurance industry's criteria for Motorcycle security
- SCM Approved - Model Specific

# GO YOUR OWN WAY

## Warning

1. Owners should be aware that only Triumph Genuine Parts, accessories and conversions for any Triumph motorcycle should be fitted to the motorcycle by an authorised Triumph dealer. Triumph does not accept any liability whatsoever for defects caused by the fitting of non-approved parts, accessories or conversions, or the fitting of any approved parts or accessories or conversions by non-approved personnel. In particular, it is extremely hazardous to fit or replace parts or accessories whose fitting requires the dismantling of, or addition to, either the electrical or fuel systems and any such modification could cause a safety hazard.

2. Only Triumph Genuine Parts should be used to service, repair or convert Triumph motorcycles. To ensure that Triumph Genuine Parts are used, always order parts, accessories and conversions from an authorised dealer. The fitting of non-approved parts, accessories or conversions may affect the handling, stability or other aspects of the motorcycle's operation which may result in an accident causing serious injury or death.

3. Always have Triumph Genuine Parts, accessories and conversions fitted by an authorised Triumph dealer. The fitting of parts, accessories and conversions by a dealer who is not an authorised Triumph dealer may affect the handling, stability or other aspects of the motorcycle's operation which may result in an accident causing serious injury or death.

4. Always have Triumph Genuine Parts, accessories and conversions fitted by a trained technician. To ensure that a trained technician is used, have an authorised Triumph dealer fit the parts. The fitting of parts, accessories and conversions by personnel other than a Triumph dealer may affect the handling, stability or other aspects of the motorcycle's operation which may result in an accident causing serious injury or death.

5. A number of accessories are supplied in kit form and require assembly prior to fitting. Please consult your dealer for full details.

The photography within this brochure shows Triumph motorcycles being used by expert professional riders in protective gear under professionally controlled, closed course conditions. Triumph does not endorse or encourage stunts, tricks or any form of irresponsible riding. Triumph motorcycles are street motorcycles. Triumph motorcycles are not suitable for off-road use. Triumph does not endorse or encourage the use of Triumph motorcycles off-road. Off-road use could expose yourself and others to serious personal injuries or even death.

At Triumph, we want every ride to be safe and enjoyable. Always ride safely, defensively and within the limits of the law. Always ride appropriately for road conditions. Always ride within your ability.

Take a riding skills course. Always wear an approved helmet, eye protection and appropriate protective clothing. Always insist that all passengers do the same. Never ride whilst under the influence of alcohol or drugs. Study your owners' manual and inspect your Triumph motorcycle before riding.

Data given to UK market specification. Specification may vary by market.

All details correct at time of going to press.

Triumph Motorcycles Limited reserve the right to make changes without prior notice.

Please consult your dealer for model and colour availability.
