TRIUMPH
GENUINE
TRIUMPH
GENUINE

Be original

Triumph Genuine Parts are the real deal.

Original equipment. The same parts that we use in the factory to build your bike. Fit them and you know without a shadow of doubt that you are replacing like with like. The same machined tolerances.

The same performance. The same obsession with safety and reliability. Ultimately, the same peace of mind.

And no compromise.

Self defence

All Triumph Motorcycles are equipped as standard with an alarm connector block within the wiring harness. This allows the Triumph alarm system to be correctly installed onto the machine without modification of the wiring loom.

The Triumph alarm system is a special development of the class leading S4 alarm system from Datatool.

Triumph alarms are designed specifically for each model to ensure compliance with insurance criteria, maximum security and quality of installation.
